## Kaddy-Karts simplify in-plant cylinder handling

*KK306 (above) has chains and latches to hold individual cylinders.*

*Kaddy-Karts may be moved with a lift truck. Models with built-in crane lifting eyes are easily lifted by an overhead crane.*

*KK600 (above) has convenient crane lifting eyes.*

*KK336 (left) secures and transports up to 14 cylinders.*

Cut your labor costs and save time, money, and heavy lifting with H&H's selection of Kaddy-Karts. They're small enough to travel conveniently through doors and traffic lanes in your plant, yet large enough to carry a good-sized supply of high pressure cylinders.

All H&H Kaddy-Karts feature a "pallet type" bottom for quick fork alignment and convenient lift truck moving. Kaddy-Kart models 302, 304, 306, 600 and 600C feature built-in crane lifting eyes for easy lifting and positioning by an overhead crane.

The KK336C and KK600C feature 600 lb. and 900 lb. under-side casters, respectively, making them ideal where door width is a problem. Model KK300CT is equipped with 900 lb. offset casters for a low center of gravity and a convenient towing hitch. All caster model Kaddy-Karts have two swivel casters and two fixed casters with brakes. Models KK336 and KK600 do not have casters.

## Additional Features

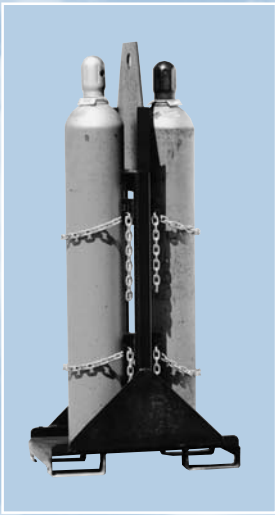

### KK300 Series

- Heavy-duty nylon security straps prevent sliding or toppling of cylinders.
- KK302, KK304 and KK306 have chains and secure chain latches to hold individual cylinders.

### KK600 Series

- Removable top rails facilitate easy unloading.
- Two lifting eyes permit easy crane handling.
